CANFIELD CONNECTOR INTRODUCES THE GATORMATE GTMC DEUTSCH STYLE DUO CONNECTOR

Streamlined connectivity for double solenoid hydraulic valves—with fewer cables and greater reliability.

Youngstown, OH — Canfield Connector has announced the launch of the GatorMate GTMC Deutsch Style Duo Connector, a high-performance connectivity solution designed to simplify wiring for double solenoid hydraulic valves while enhancing durability and performance in extreme environments.

Engineered for versatility and built to withstand the toughest industrial and mobile conditions, the GTMC system brings a new level of efficiency to valve wiring. It features a single multi-paired cable that connects to the first solenoid via a rugged DT0 2-pin Deutsch connector and then jumps power and signal to the second solenoid through a compact GT 180 connector. This design significantly reduces cable bulk, minimizes installation time, and eliminates unnecessary connections—without sacrificing reliability.

"The GTMC is a great example of how we continue to push connector innovation forward," said Todd Harmon, Vice President of Canfield Industries. "It not only simplifies system architecture but also maintains the uncompromising ruggedness our GatorMate line is known for. It's designed to perform where it matters most—in harsh, demanding environments where uptime and ease of installation are critical."

The GatorMate GTMC is fully customizable, available in various cable lengths to meet diverse application needs. For added functionality and protection, both connectors can be equipped with indicator lights and surge suppression options. These features make the GTMC ideal for OEMs and system designers who demand high-performance solutions for hydraulic or pneumatic systems in construction, agriculture, manufacturing, automation, and for use in hydraulic power units.

About Canfield Connector

Canfield Connector manufactures innovative DIN and Deutsch type connectors, angle and position sensors, magnetic actuated sensors for the linear cylinder market, timers and other complimentary products for North American manufacturing-based industries. As an ISO 9001-certified company, Canfield Connector designs and manufactures high-quality, durable components in the United States. Canfield products are sold through authorized distribution centers or direct for industries such as OEM equipment manufacturing, construction, food processing, beverage distribution, chemical processing, agriculture, industrial automation and others, and can be customized to meet specific customer requirements.
